

THE MASCOT OF THE PROJECT

The mascot proposed by Romania is a tree with six roots and six branches, the same as the number of the countries participating in the project.

In Romania, we have a song saying that the root of our people lies deep in the land of the country.

We thought that every nation has its own roots, this meaning its own cultural heritage. Each root, each cultural heritage, is deeply rooted in its own national soil, so we all define ourselves as peoples, resembling and distinguishing.

The tree trunk is the way to follow in our project. Just as the water flows from the roots through the trunk, then into the branches, so the message of our project will find its voice in the six branches of the tree.

Everything that distinguishes us can unite us in a Europe in which the cultural heritage is an inclusive path of participation and changing.
